# For Manufacturers and Network Providers: Technical Alignment for Scalable EV Charging

Powering EV Charging That Works for the Market

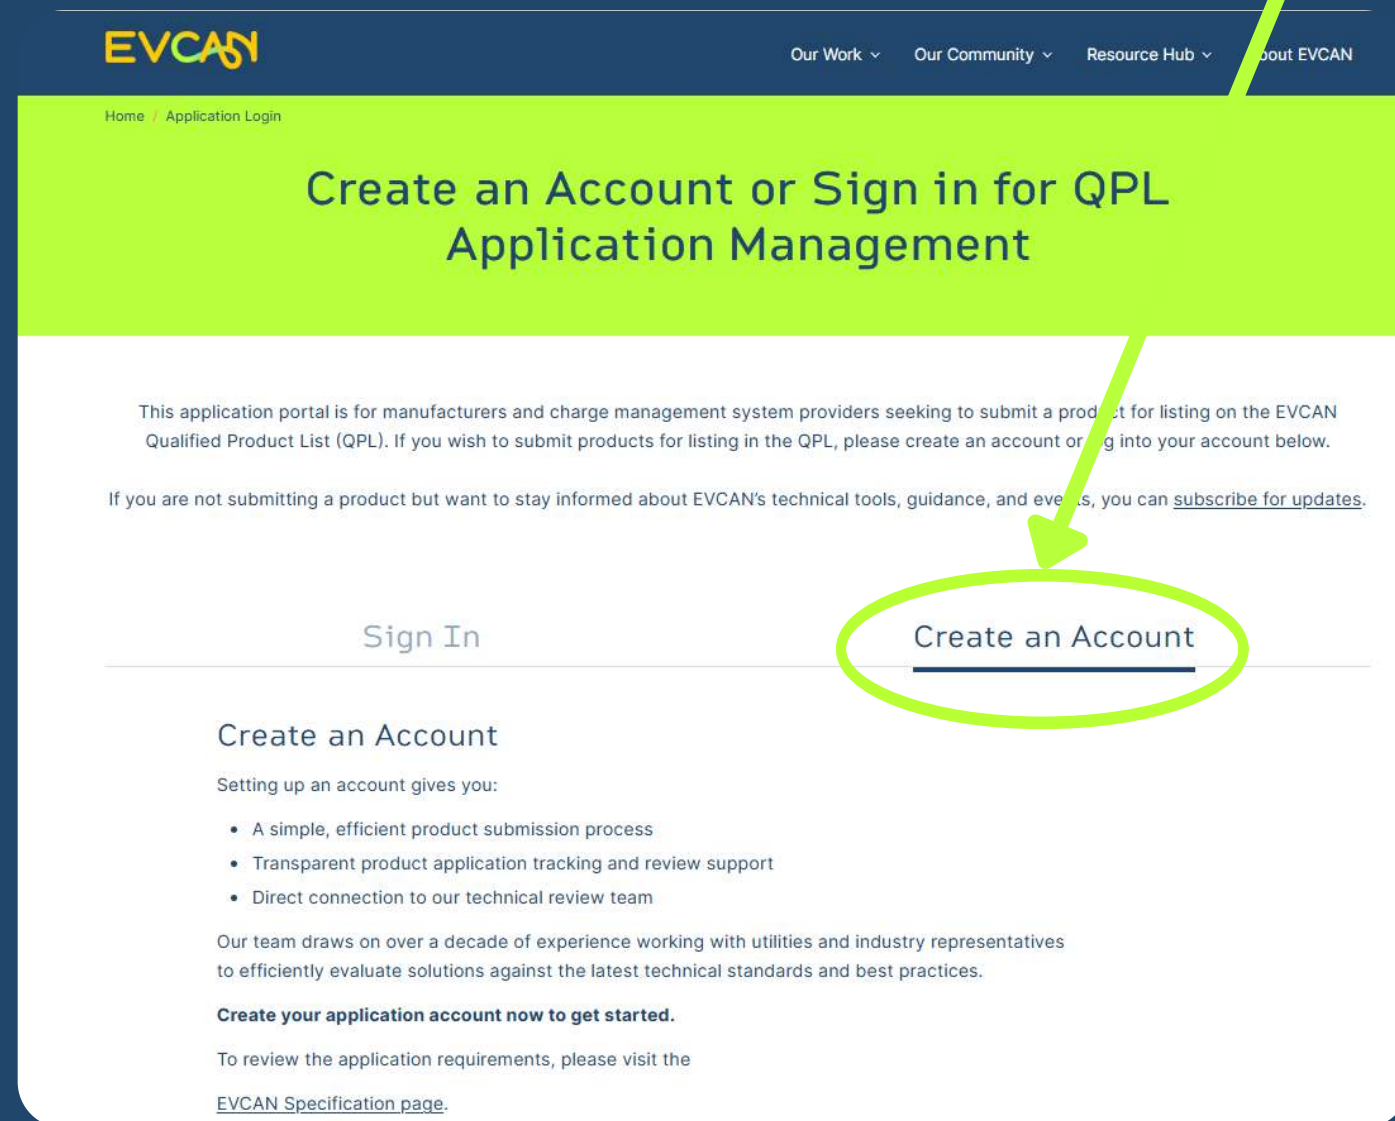

Through technical screening and product qualification, EVCAN's technical requirements help to align utility expectations for manufacturers and network providers to scale reliable, standards-based charging solutions. Our forthcoming Qualified Product List (QPL) offers a clear, impartial pathway to support broad market participation.

### Create an Account

Setting up an account gives you:

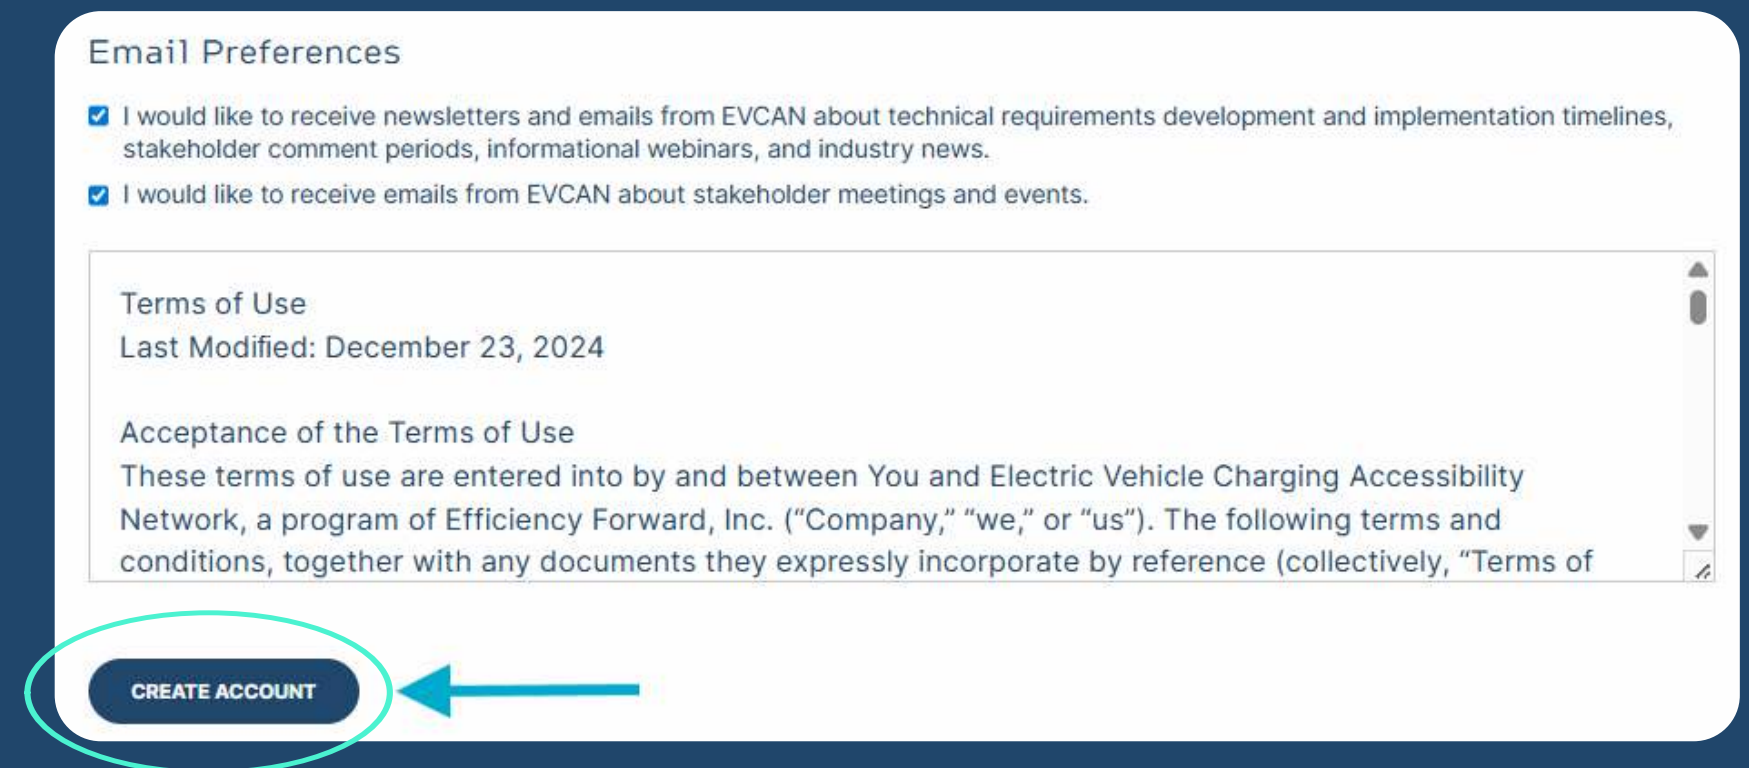

- A simple, efficient product submission process
- Transparent product application tracking and review support
- Direct connection to our technical review team

Our team draws on over a decade of experience working with utilities and industry representatives to efficiently evaluate solutions against the latest technical standards and best practices.

**Create your application account now to get started.**

To review the application requirements, please visit the [EVCAN Specification page](#).

At the bottom of the form, click the **CREATE ACCOUNT** button to submit your information.

### Email Preferences

- ☒ I would like to receive newsletters and emails from EVCAN about technical requirements development and implementation timelines, stakeholder comment periods, informational webinars, and industry news.
- ☒ I would like to receive emails from EVCAN about stakeholder meetings and events.

### Terms of Use
